PRESETS (Load/Save)

No presets included in the FREE version

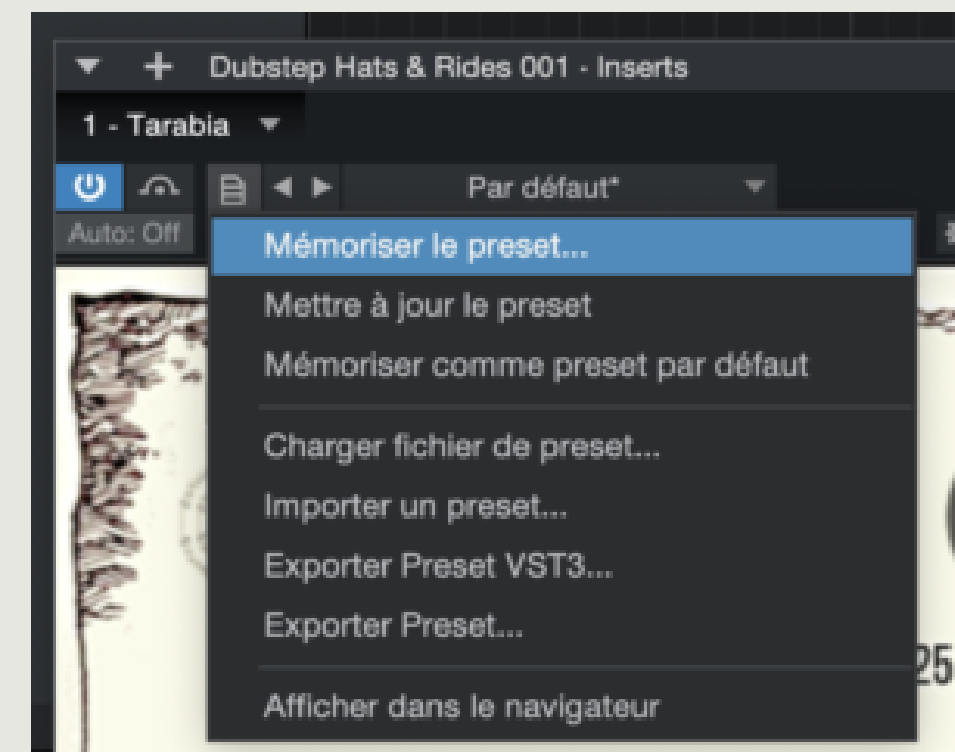

However, you can SAVE your own presets (and recall them with ease) using the dedicated function in your DAW (in Studio One, in Ableton Live, etc.), here some examples ...

Ableton Live

Bitwig Studio

Studio One

YAMATUBE Dynamic Tube Processor

FREE VERSION

ANALOG TUBE I

Sweet to Saturation color

Color your mix & add DENSITY to your sound sources

EDGE Shelf equalizer

Switch ON/OFF

Add subtle PUNCH to your sound

A special Baxandall equalizer curve is applied with a gain set at +2DB

INPUT GAIN

Change the input sound level.

TIPS : We advice you to use low input level value (-4db, -6db, -8db, etc.) and increase PRESENCE / LO-AIR parameters to get a lot of punch without distortion artefacts.

ANALOG TUBE II

Sweet to Saturation color

Color your mix & add AIR to your sounds

BRILLIANCE Shelf equalizer

Switch ON/OFF

ADD sound details & brilliance to your sound

A special Baxandall equalizer curve is applied with a gain set at +2DB

OUTPUT GAIN

Change the output sound level.

TIPS : We advice you to use this parameter as less as you can. If the sound is low, try to change the PRESENCE/LO-AIR parameters.

ANALOG TUBE I

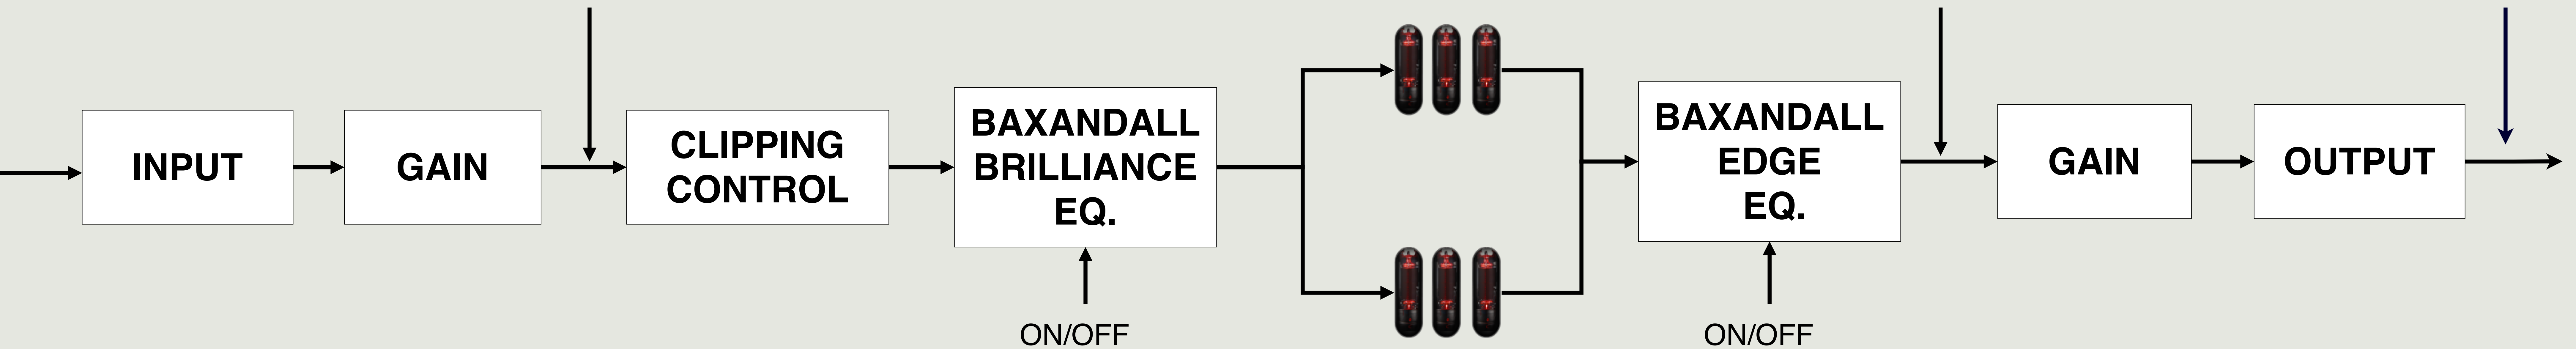

Applied on specific frequencies bands to boost PRESENCE feeling

OVERSAMPLING X 4

TIPS : Add your own limiter

We advice you - when you can't control the sound level - to add your favorite Limiter plugin

DOWN SAMPLING X 4

2x Vacuum Tubes inspired by [TaraTube](#) plugin.

ANALOG TUBE II

Applied on specific frequencies bands to produce LO-AIR feeling

2x special Baxandall EQ. inspired by [AIR WINDOWS](#) plugin.
